

We help you create **awesome** maps.
interactive
custom
collaborative
data-rich
real-time
location-aware
sharable
mobile
contextual
visualization

Map Platform Agnostic

- 18+ Basemaps
- Sub-meter resolution
- Updated every ~6 weeks

Geospatial Foundation

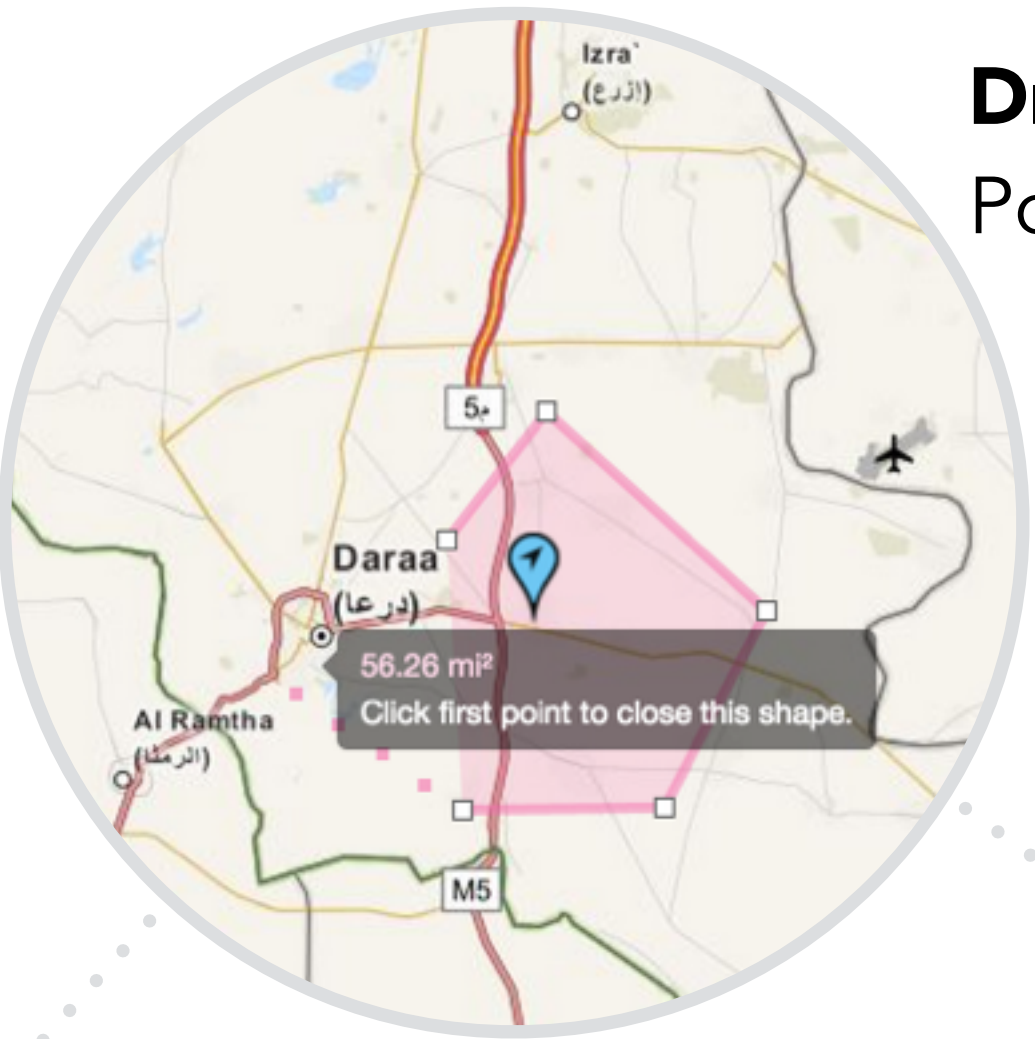

Map Annotation

Drop pins, add notes

Drawing Tools

Polygons, lines, and squares

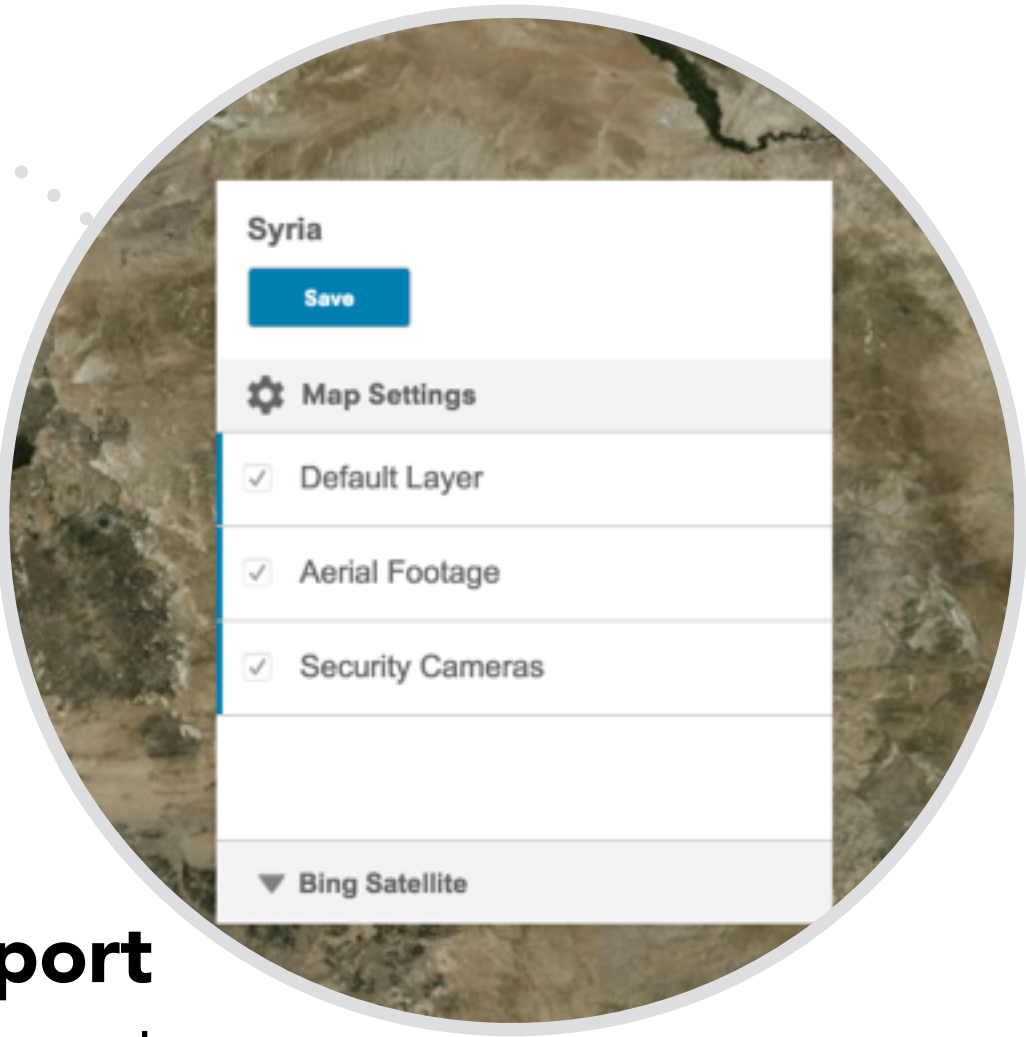

Multi-Media Support

Images, Video

Multi-Layer Support

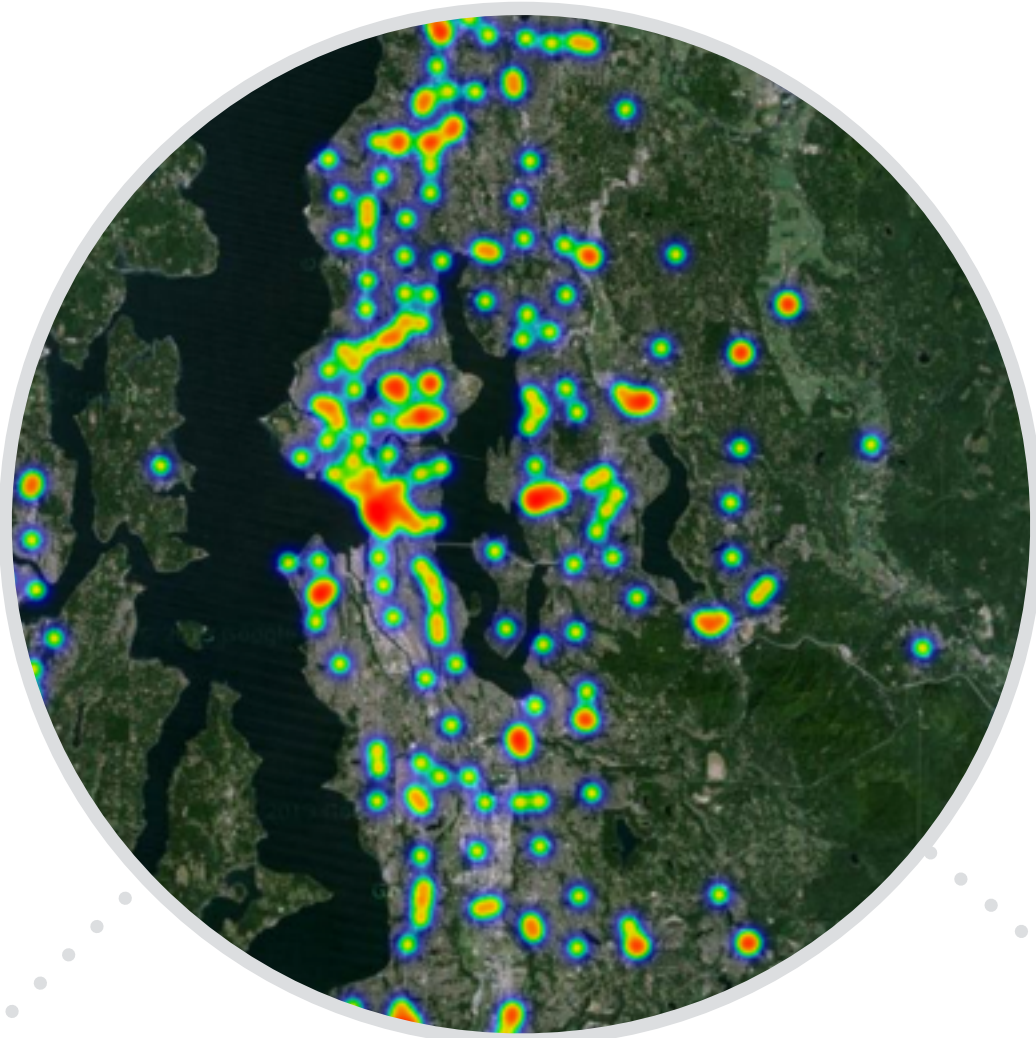

Add + Remove layers on demand

Data Visualization

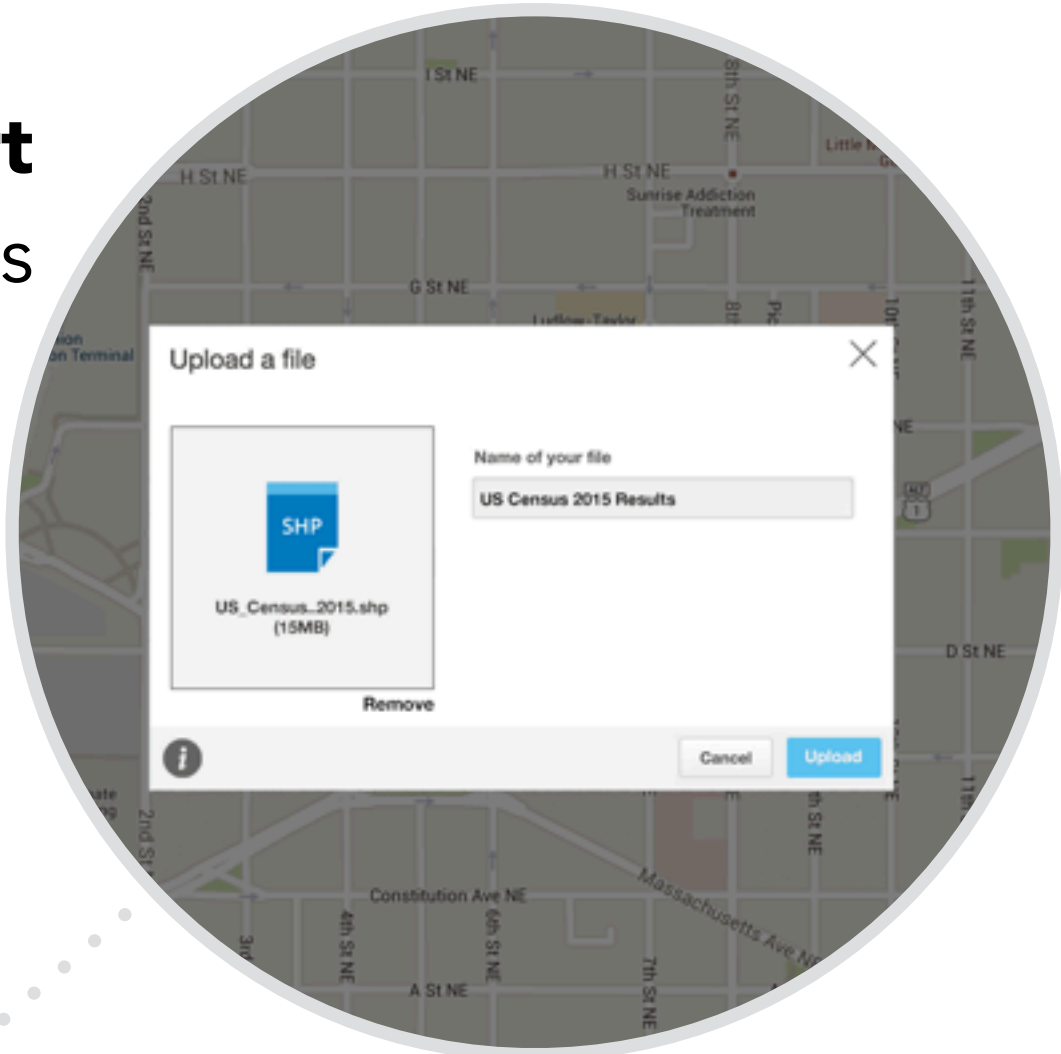

Data Viz

Heatmaps, Clusters, Points

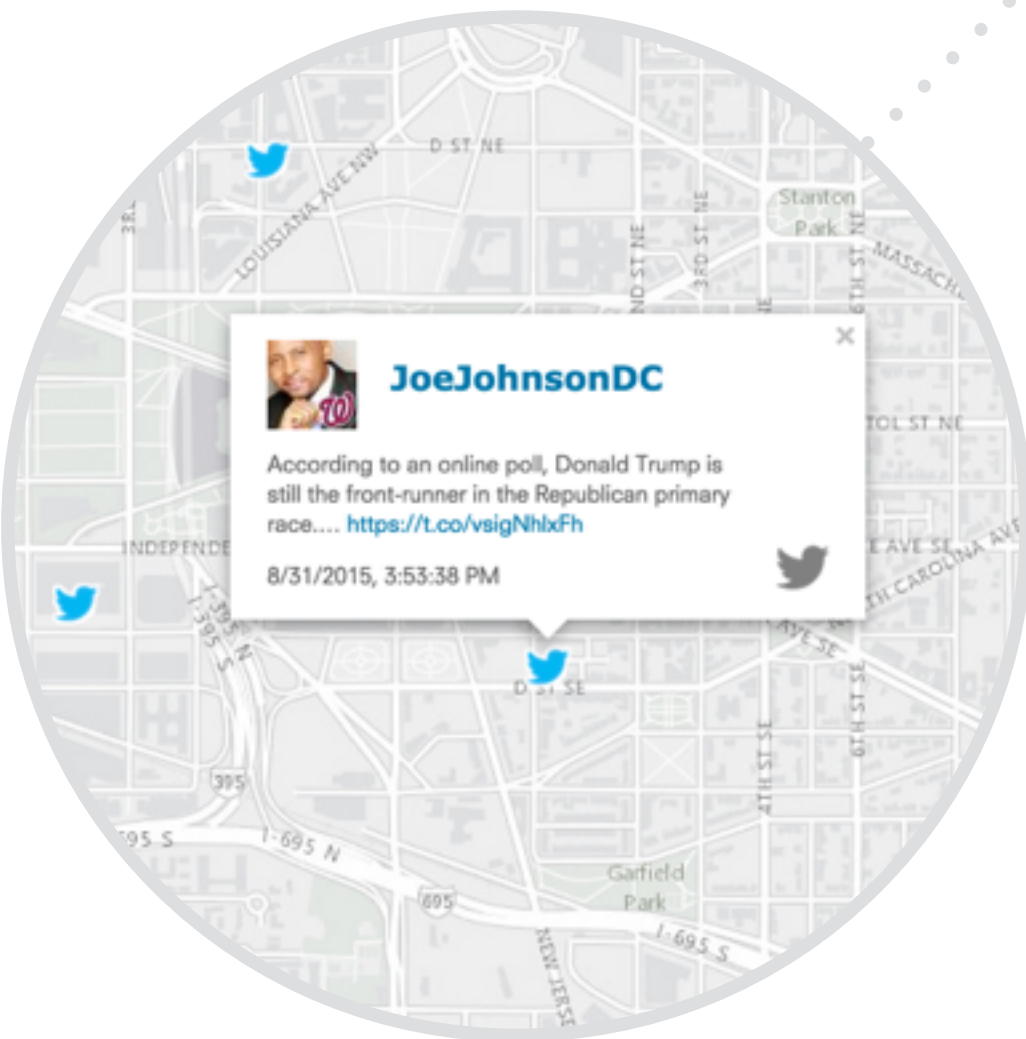

Data Import

Upload Shape, CSV, and XLS files

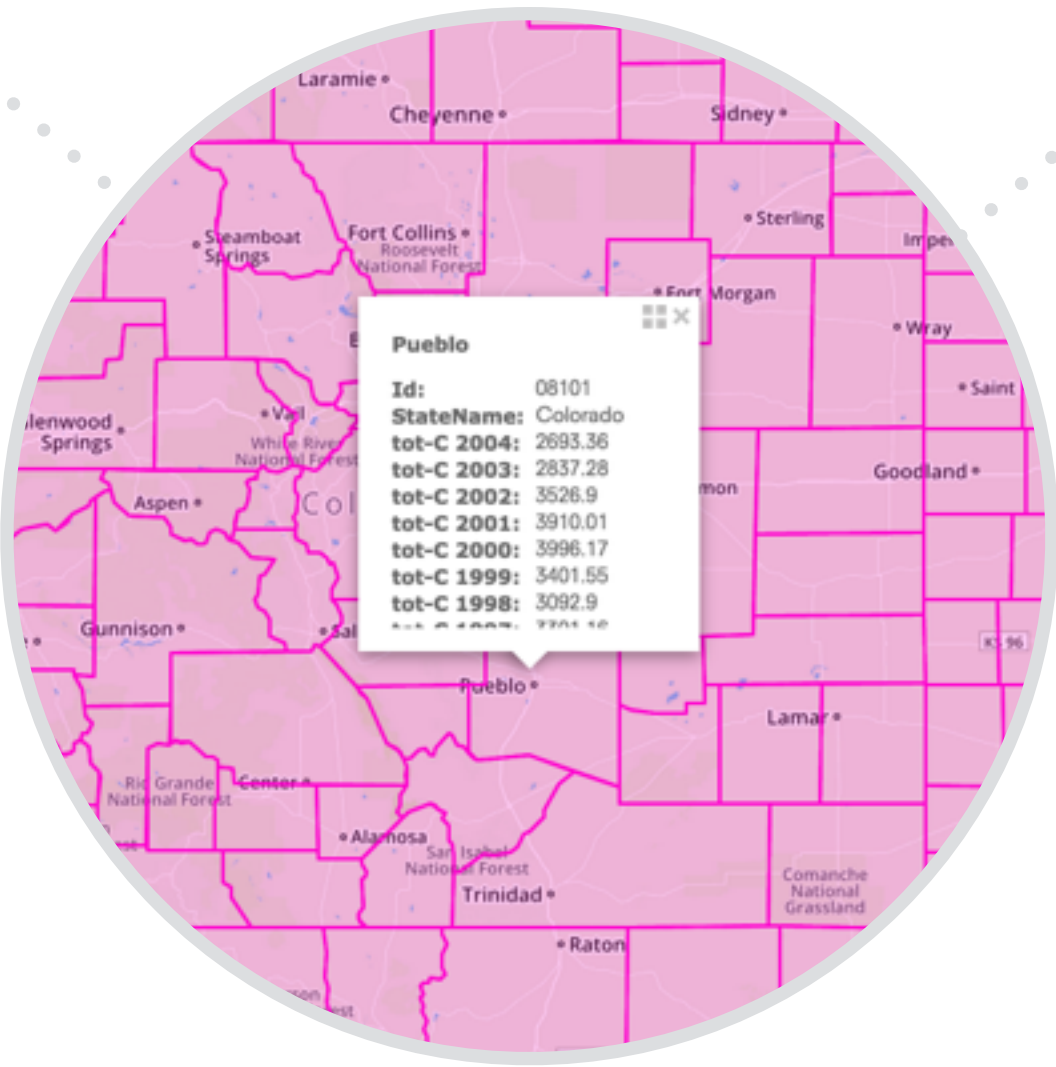

3rd Party Data

50+ API integrations

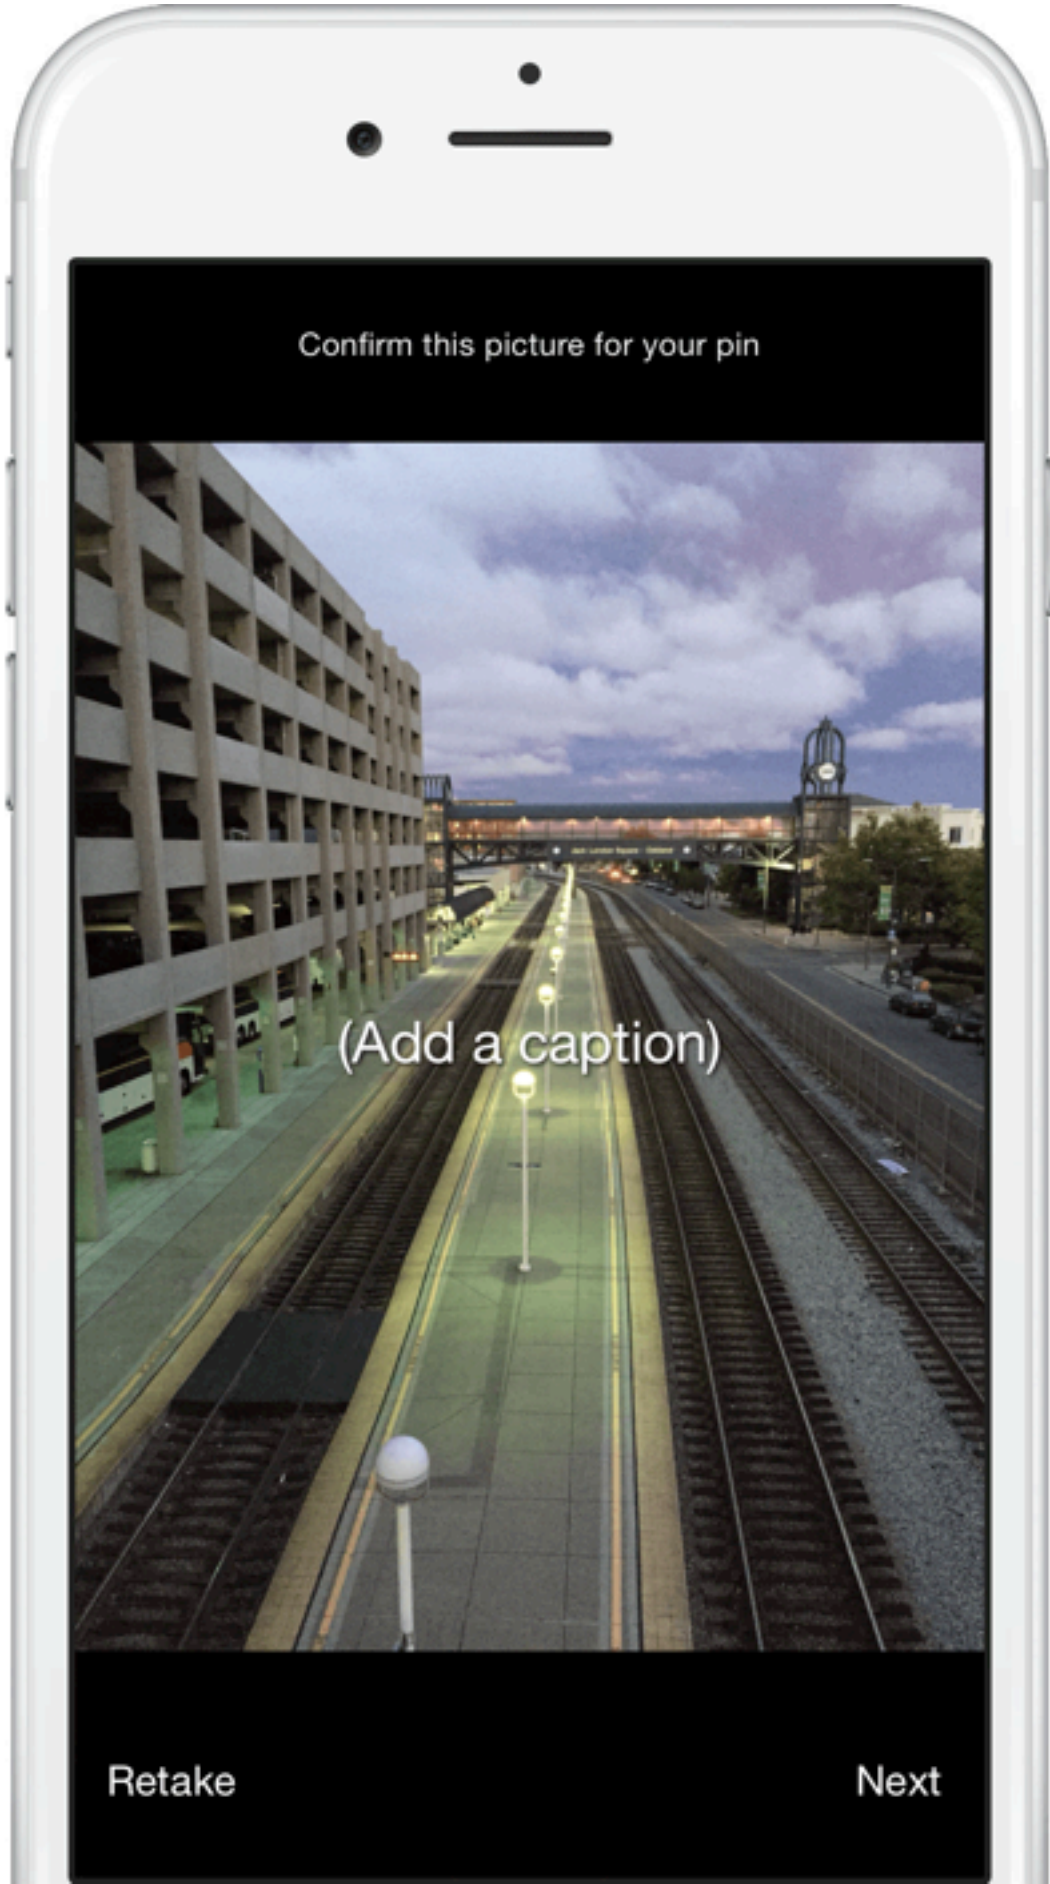

Remote Data Import

From SQL Databases

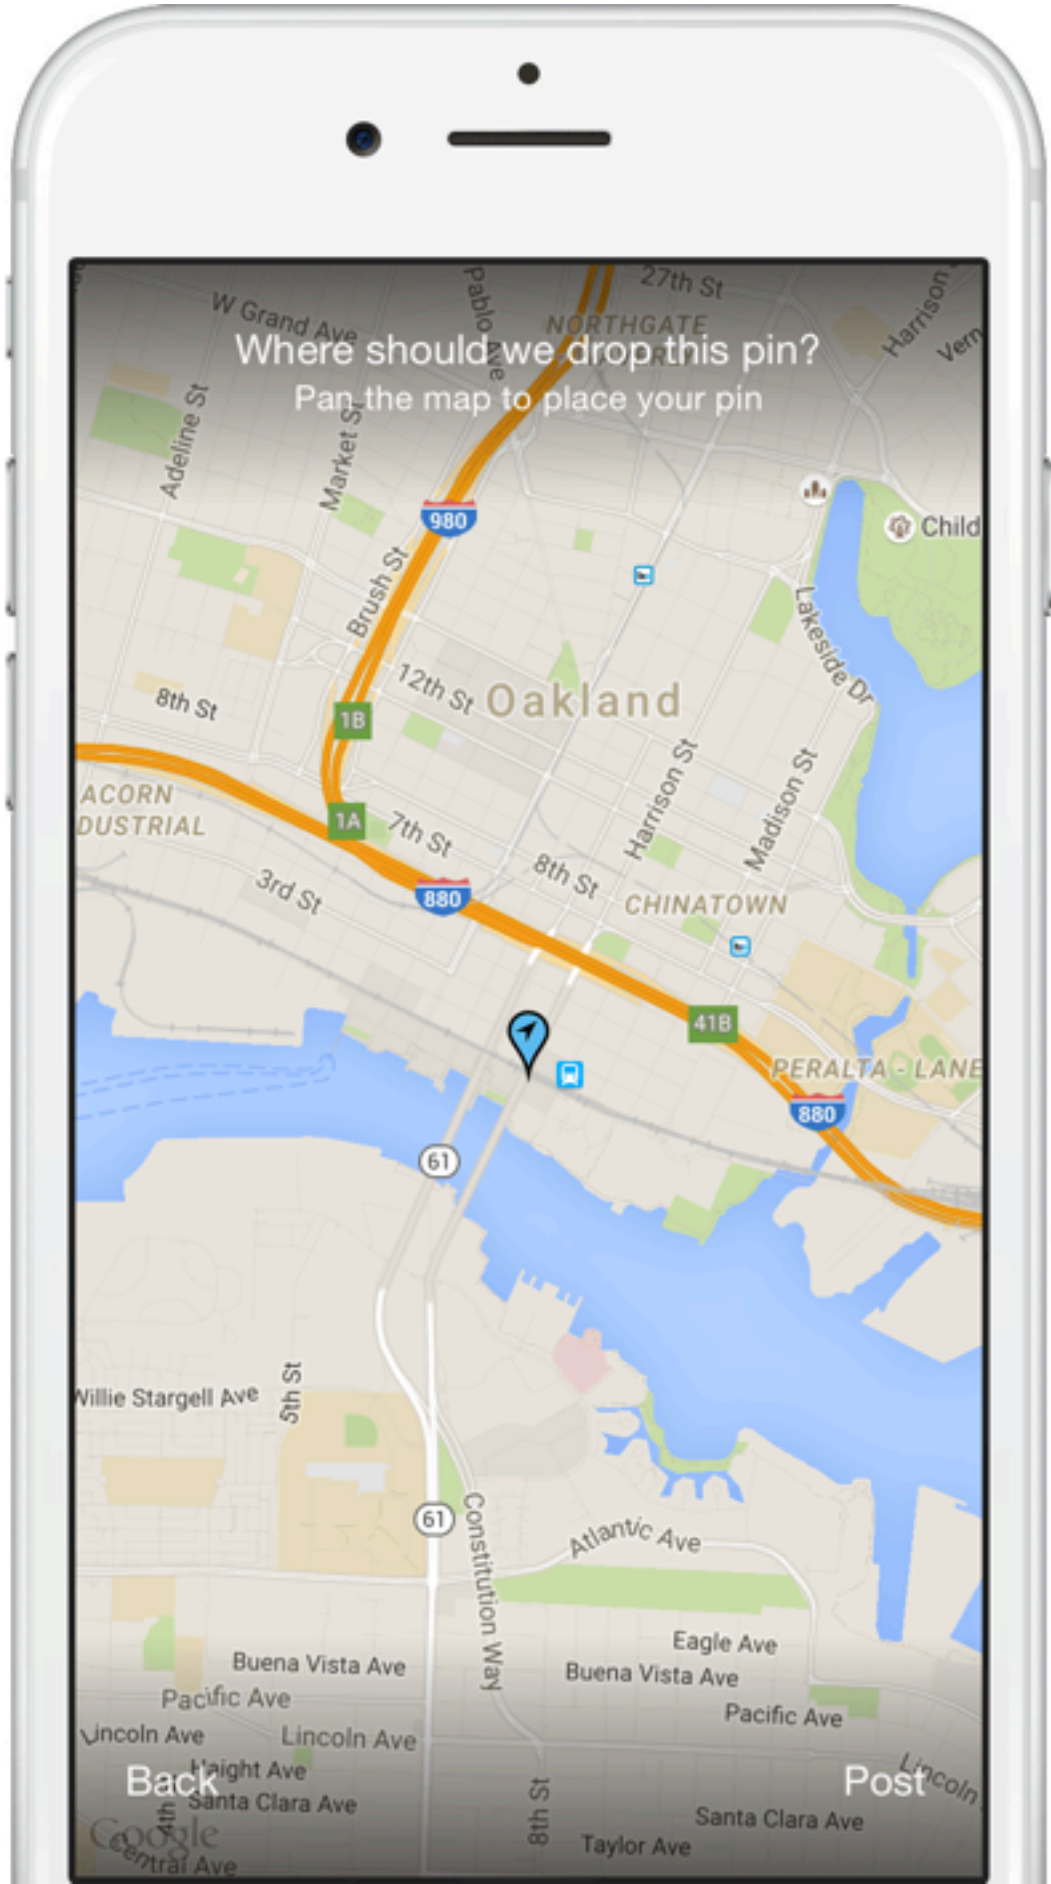

Creating a Pin

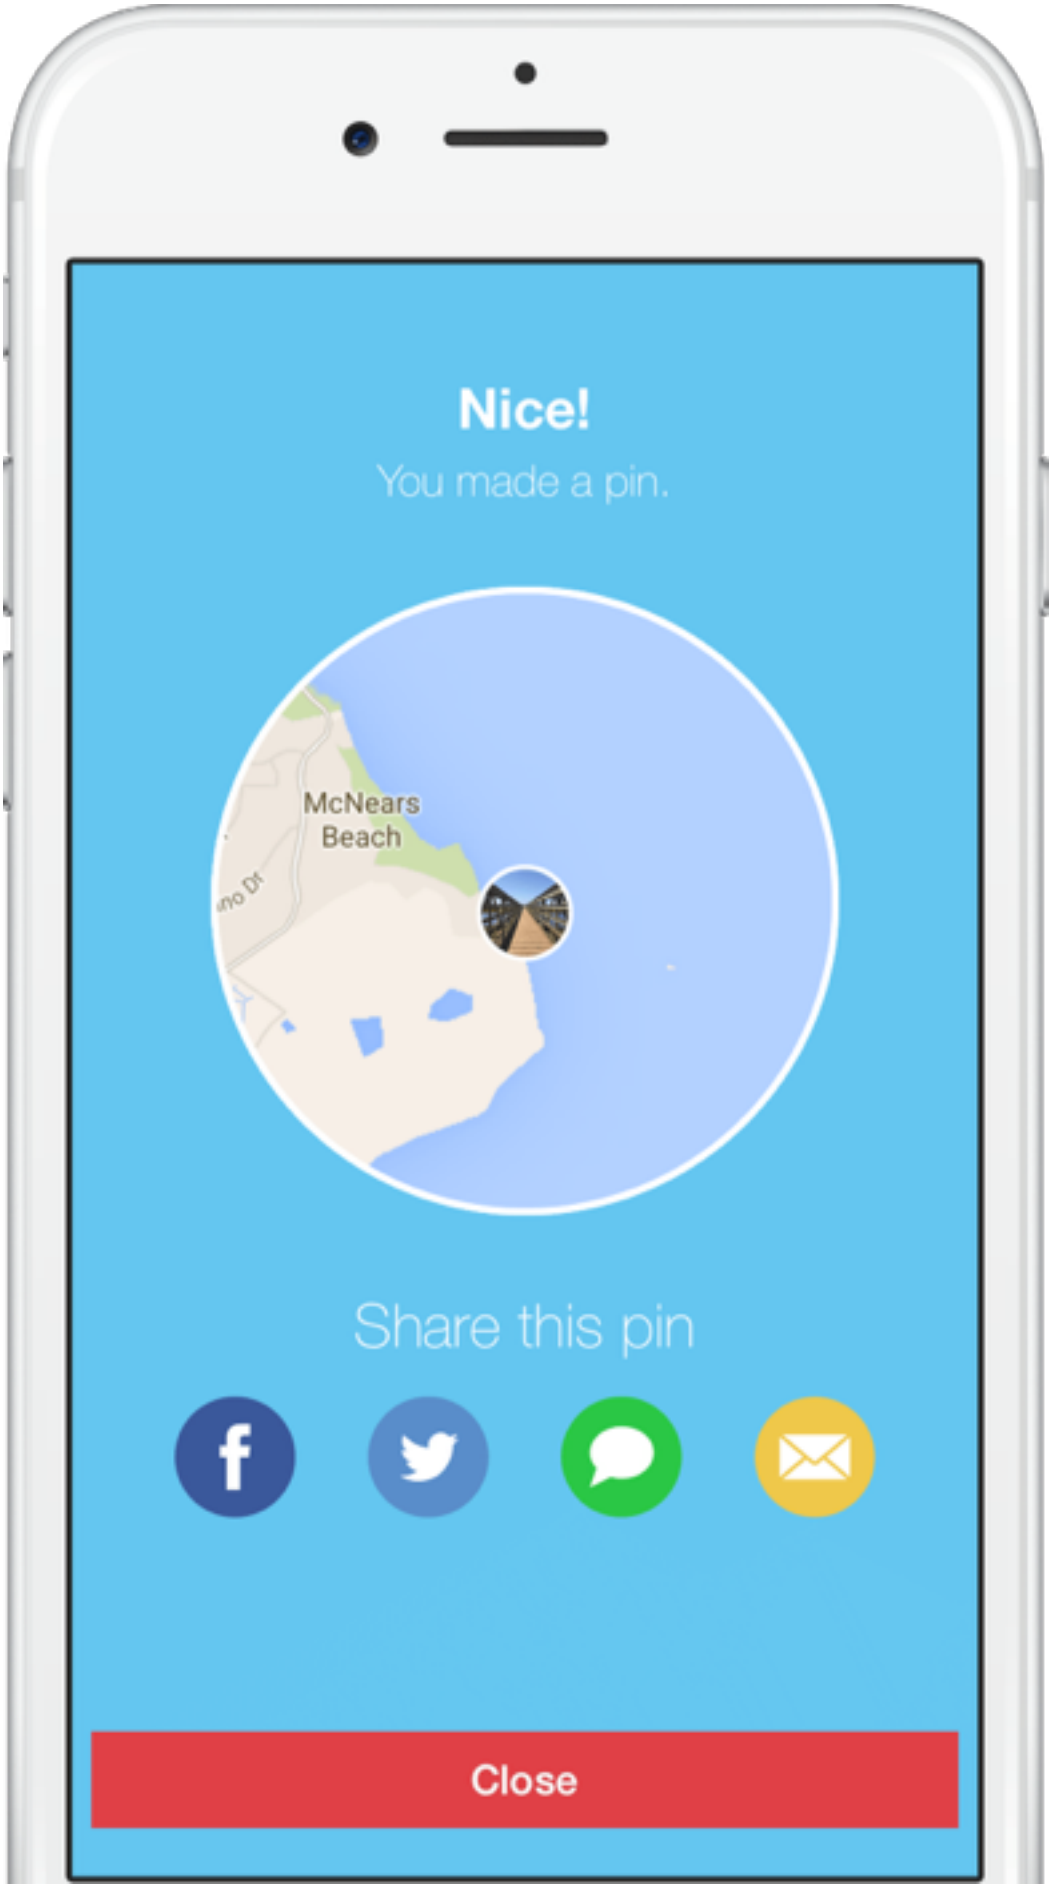

Take a picture

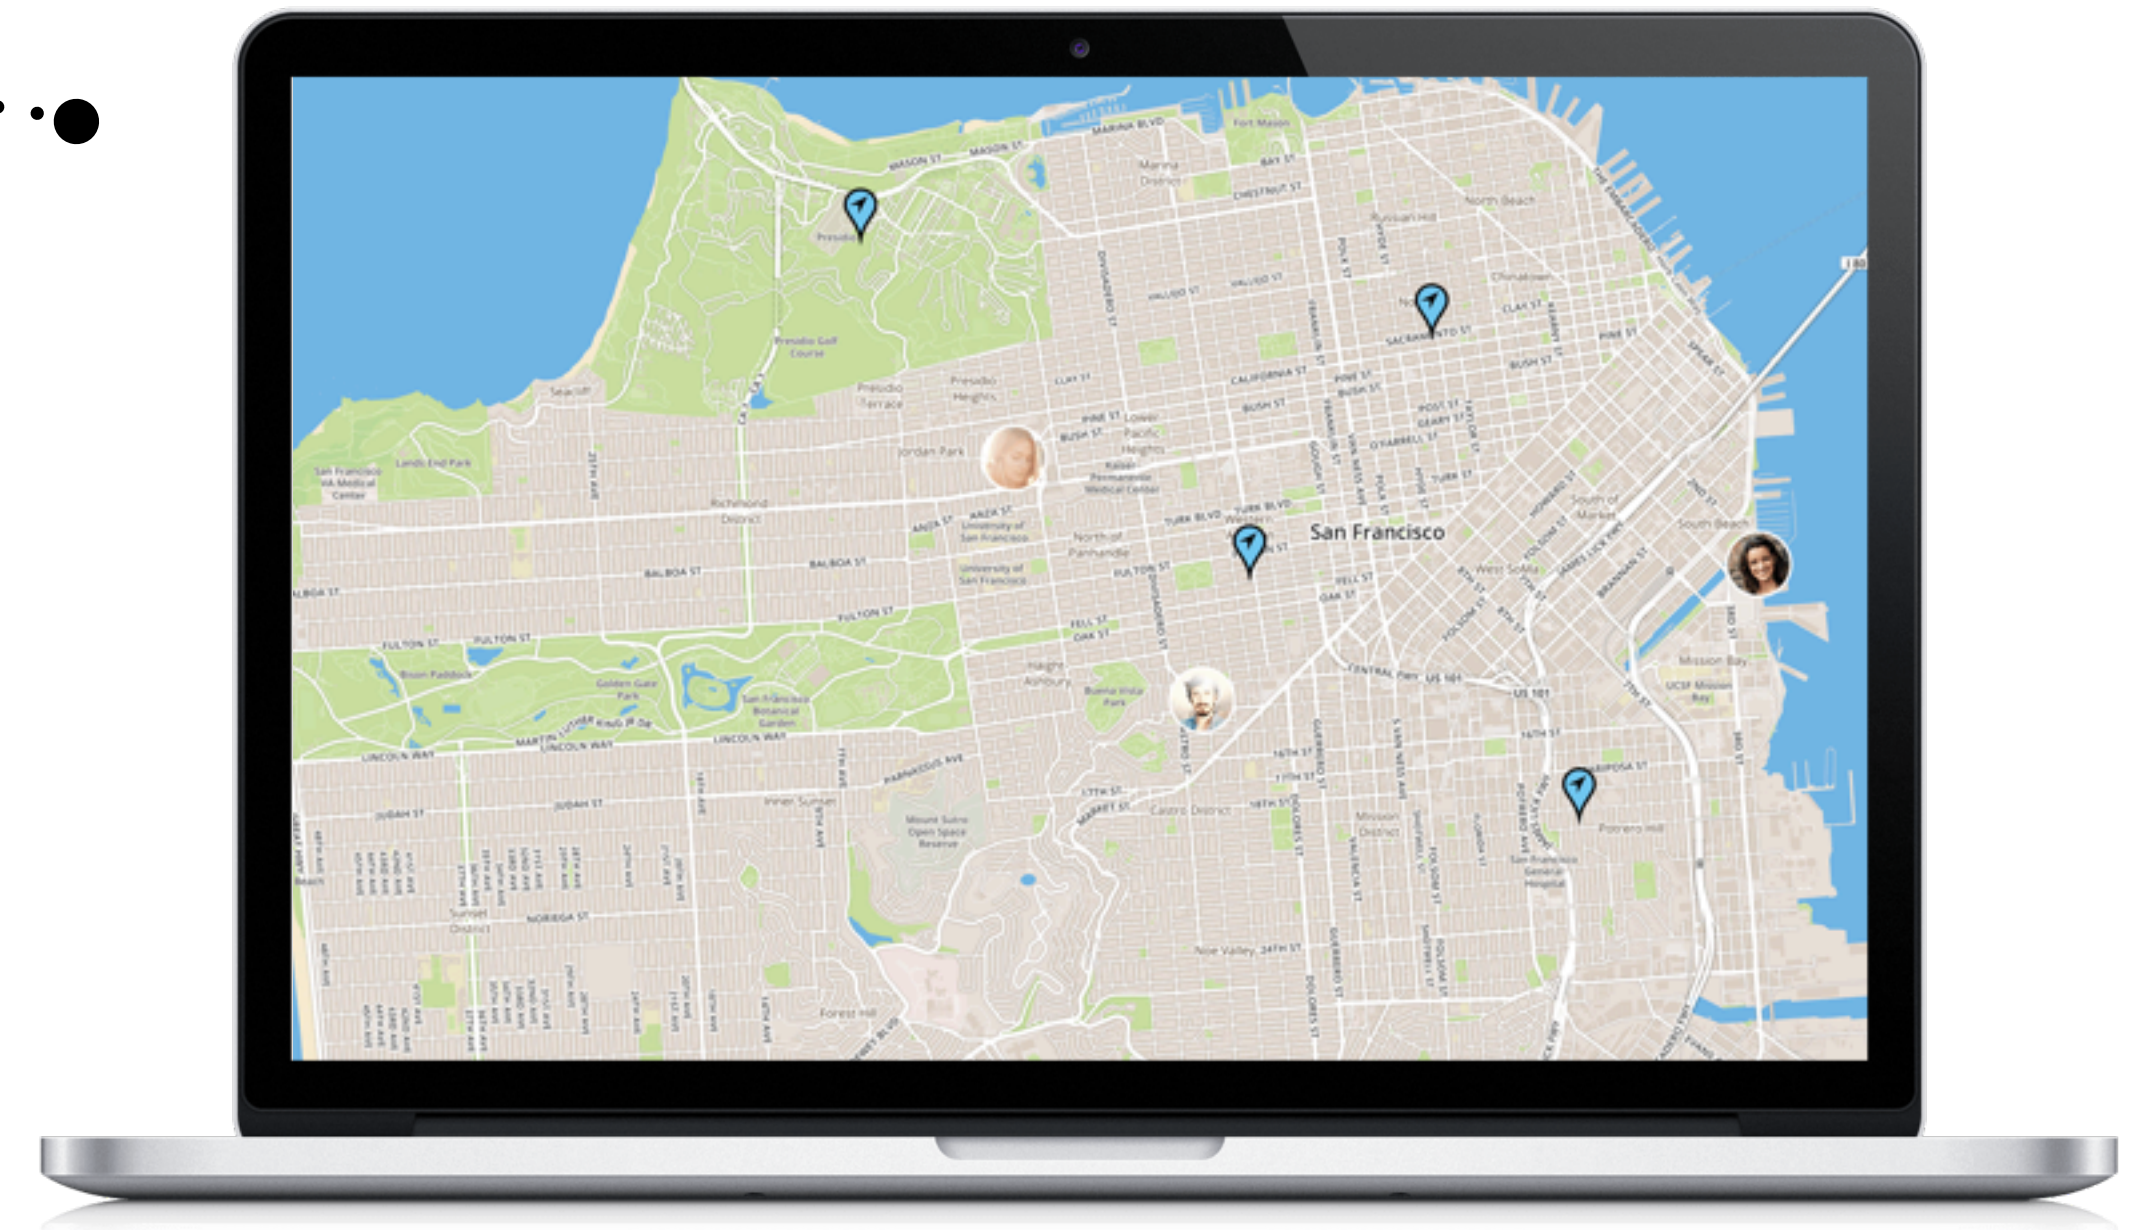

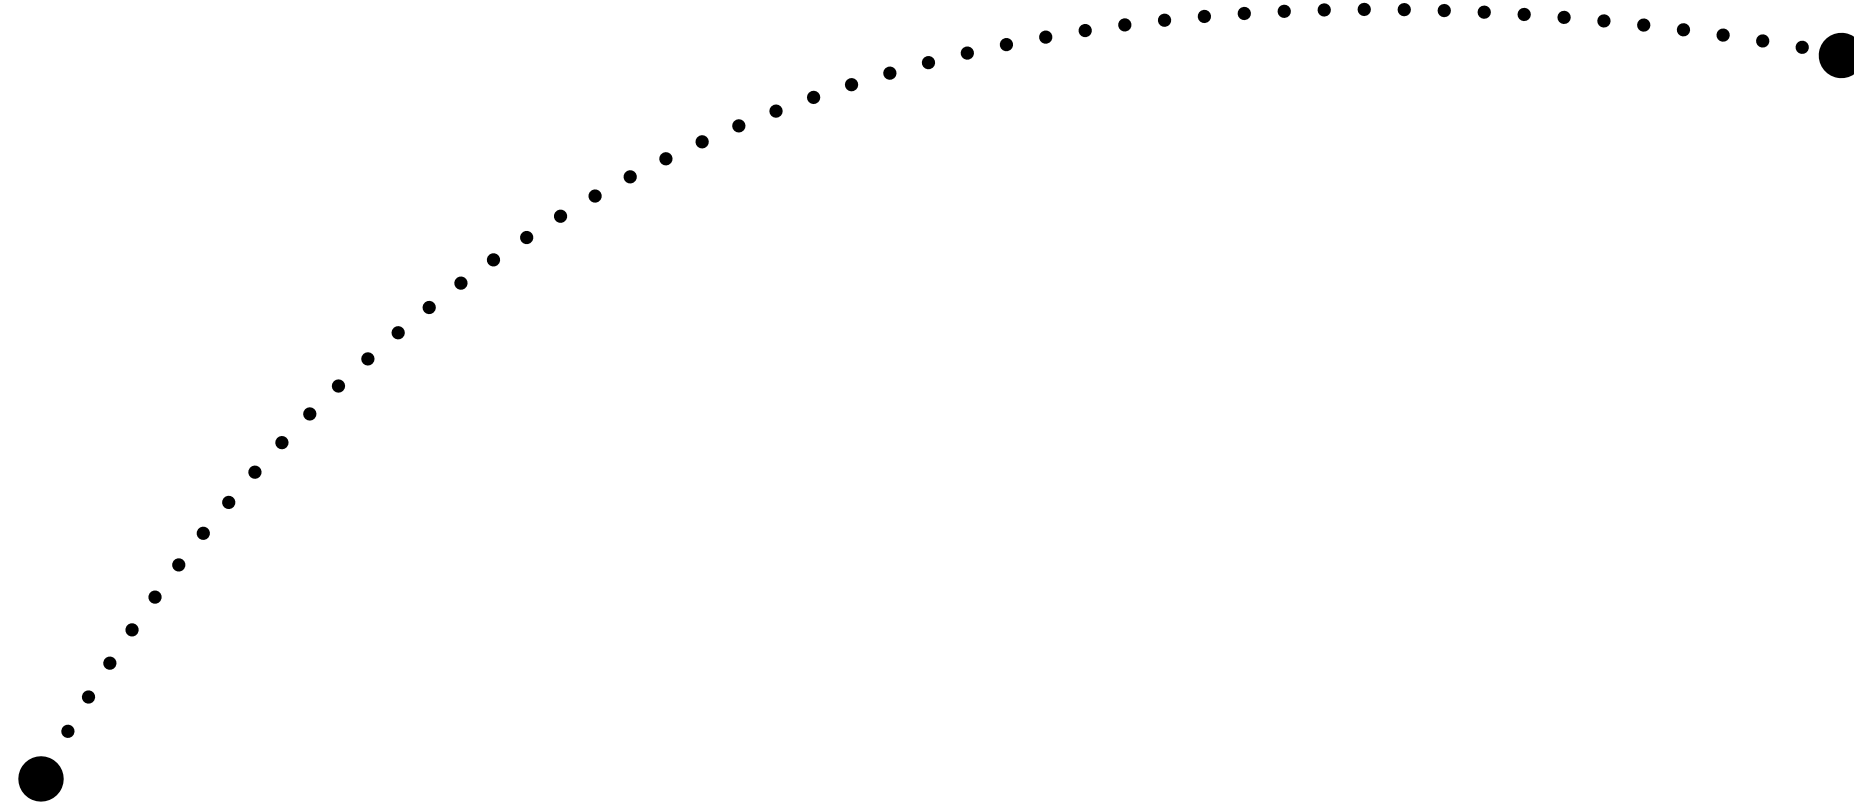

Confirm location + map

Share It

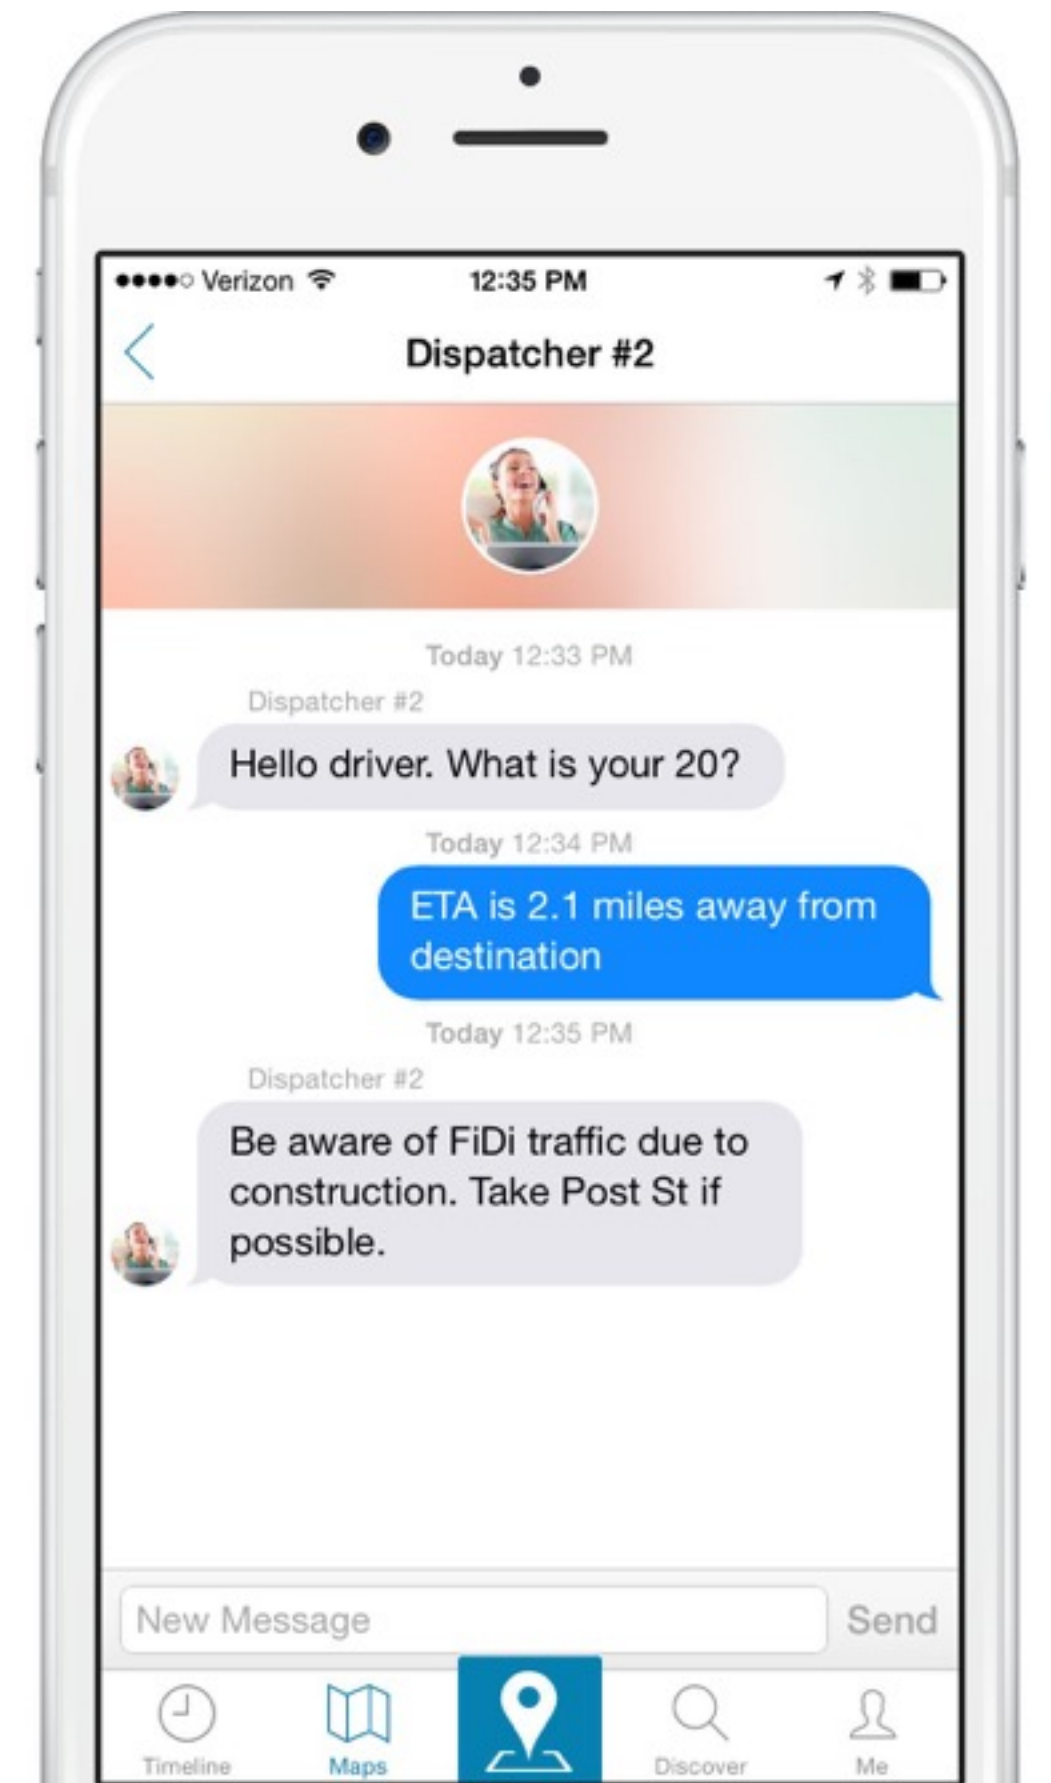

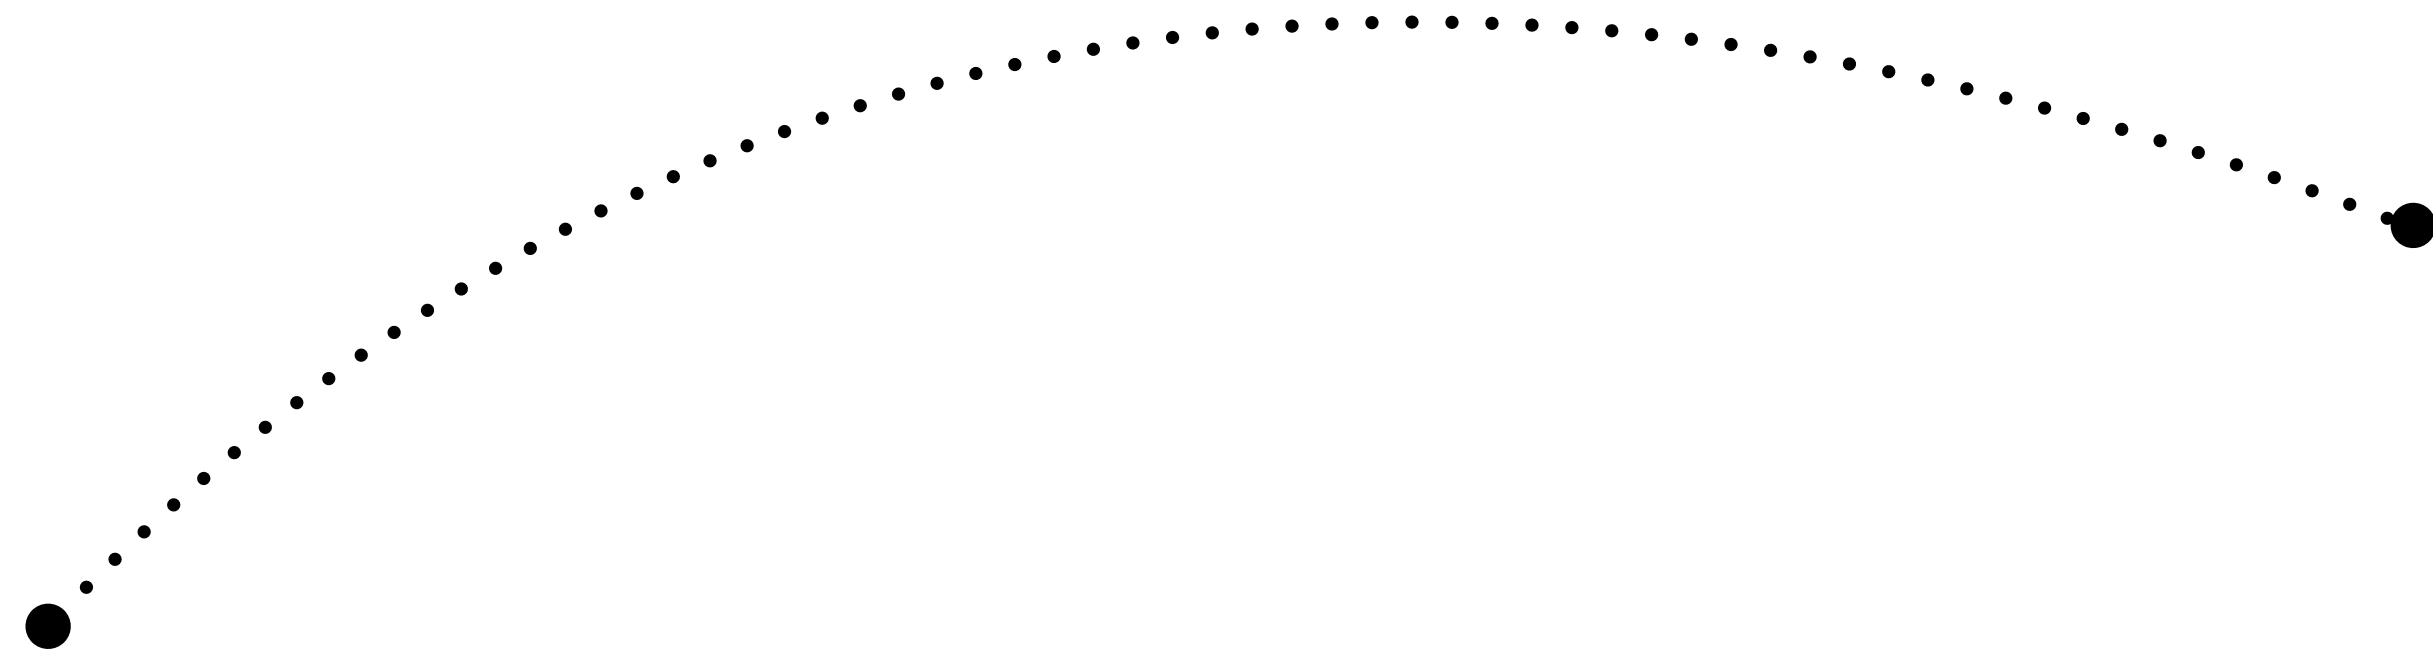

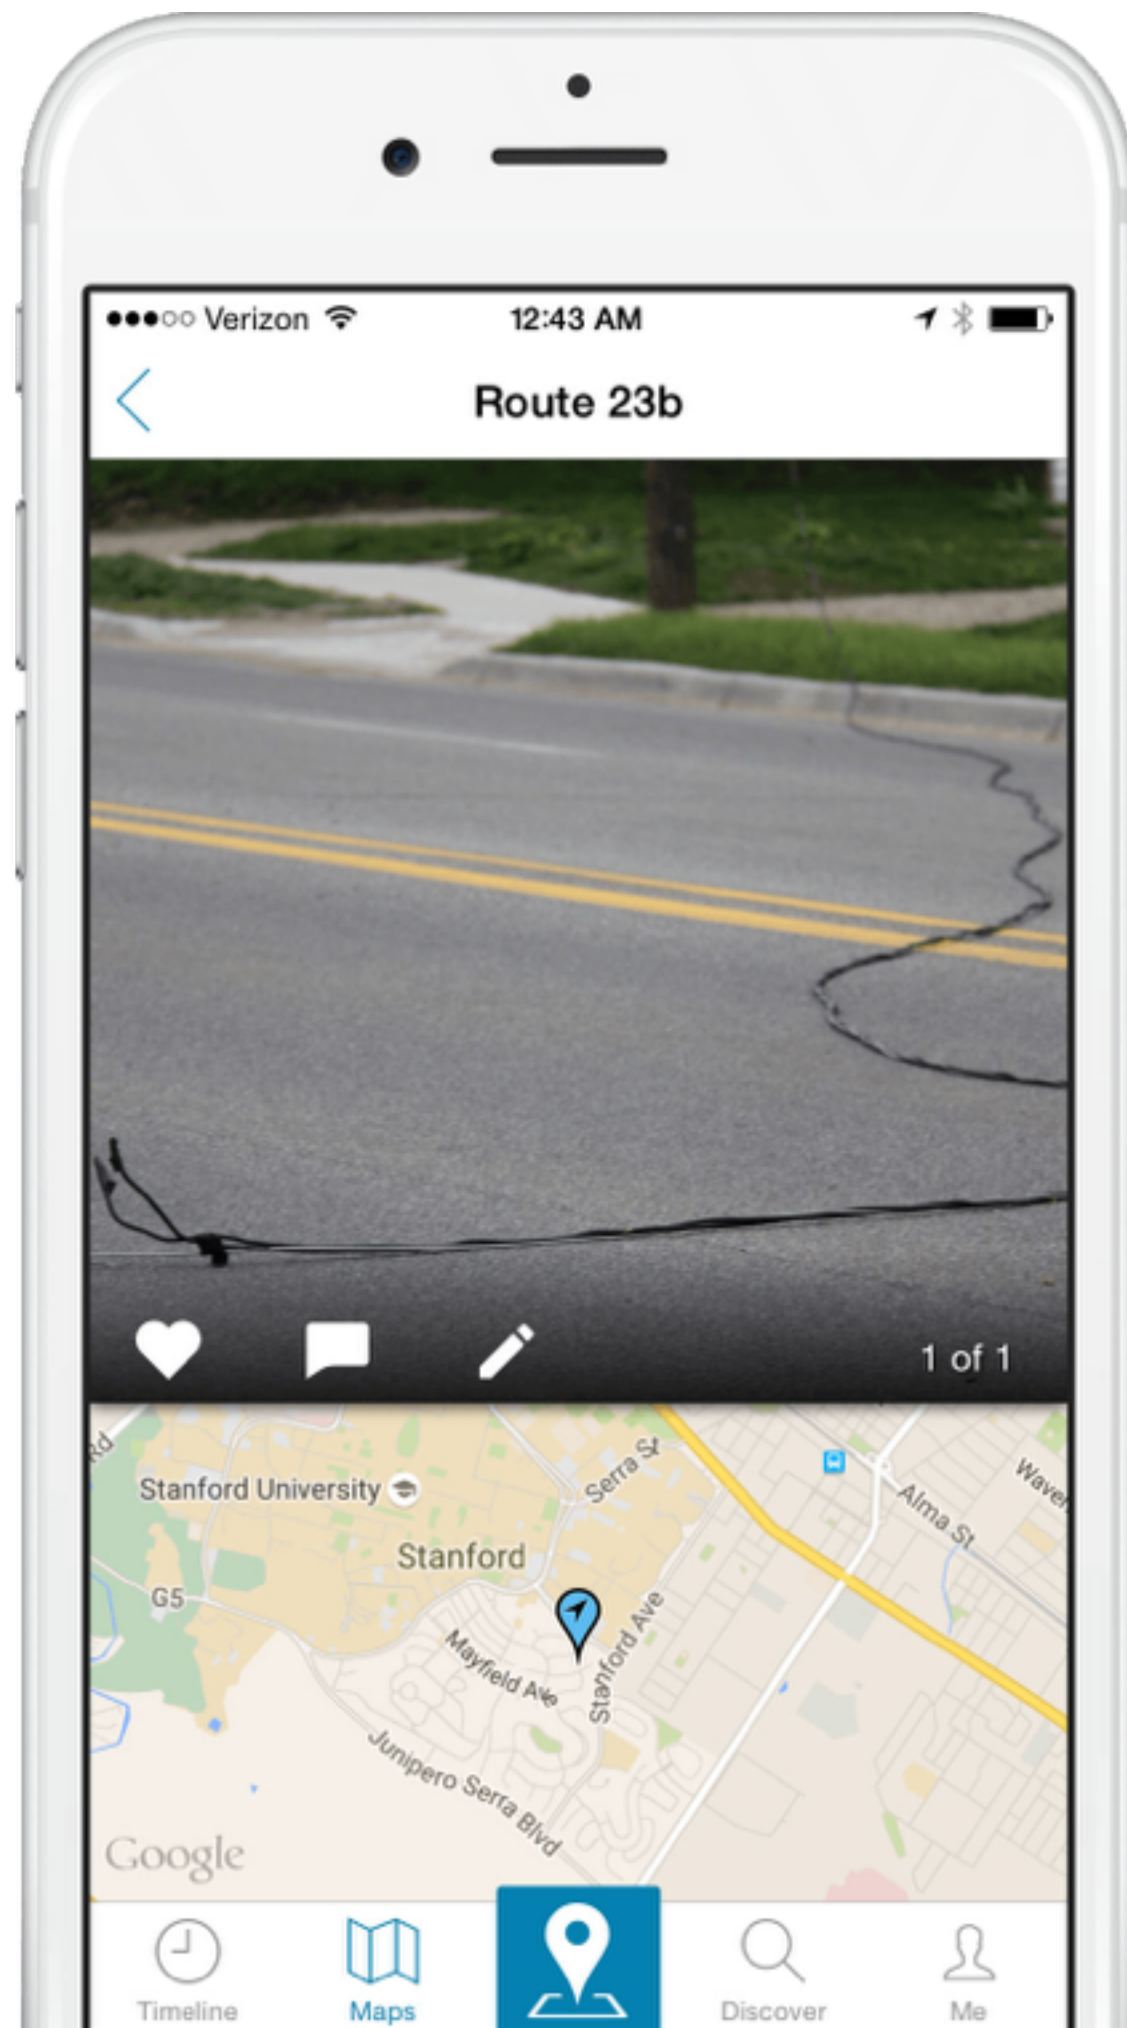

Location Sharing

- Track people, drivers, and deliveries en route: Command + Control
- Route planning optimization
- Real-time location updates on the mobile and desktop apps
- Privacy scope: Everyone sees everyone vs. Map owner sees everyone
- Turn off location sharing at anytime

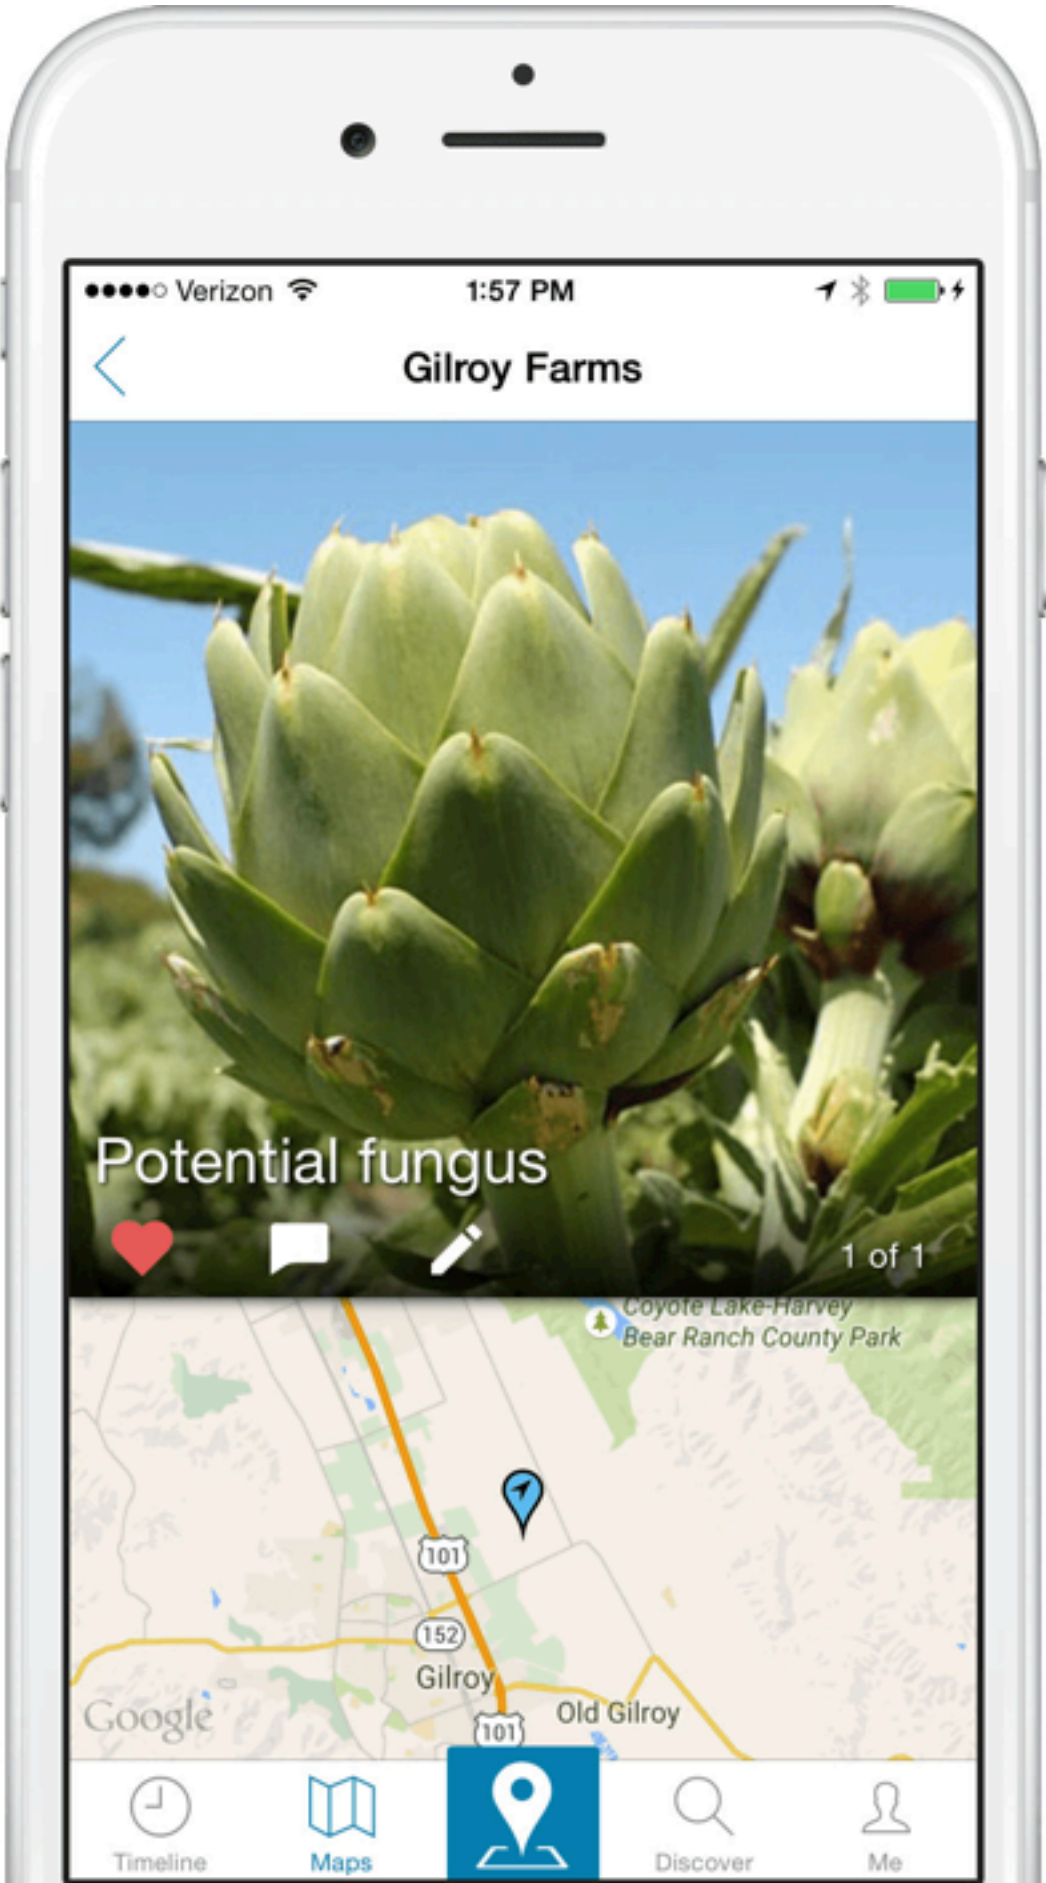

Remote Collaboration

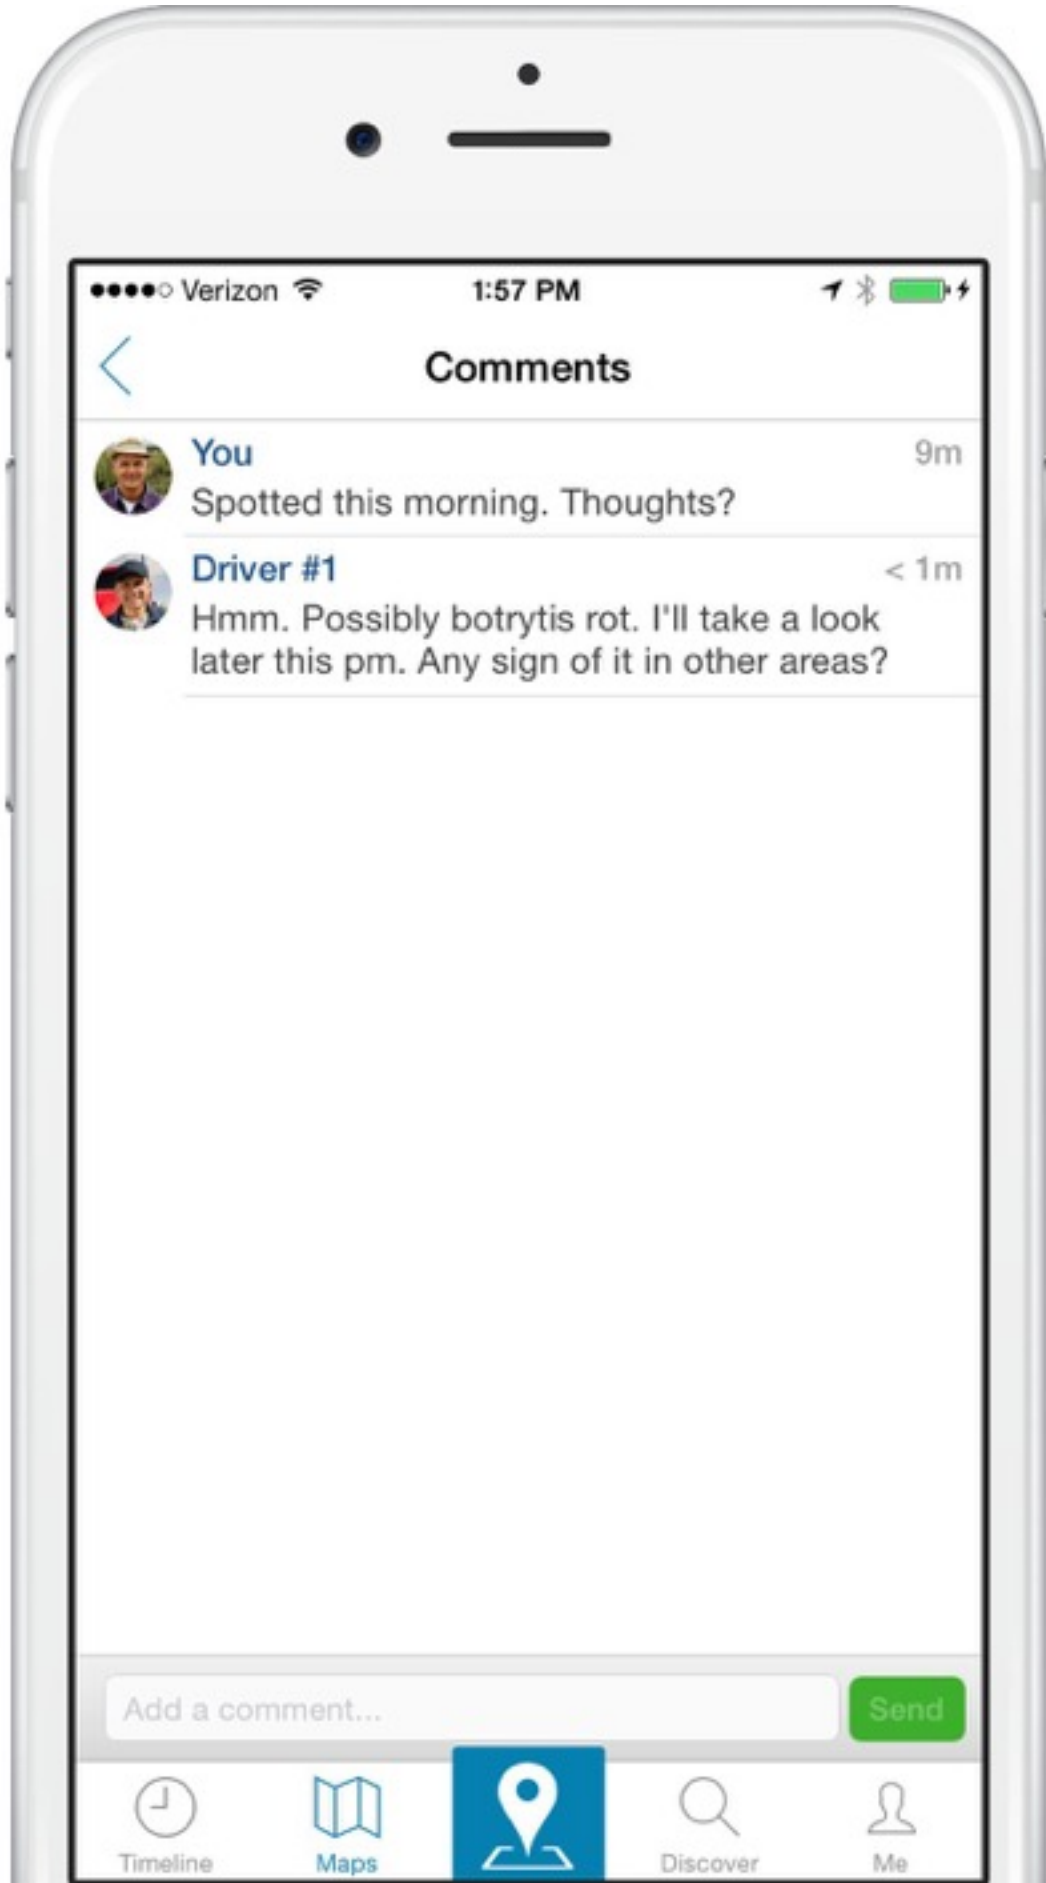

- Role-based authentication
- Drop pins for collaborators to see
- Comment on the pin + create notes
- Send direct messages within the app
- Make real-time pin updates: location + details

Social Features

```

- 150+ secured, individual RESTful endpoints
- Maps, Data, Location, Social, and more
- Leverages geospatial data store

TBD
